W3 School

Certifications

freeCodeCamp, Coursera

About Me

I'm a self-taught **Frontend Developer** and **CSS Specialist** with a passion for building **beautiful, animated, and responsive websites** using only vanilla HTML, CSS, and JavaScript.
I also perform as **DJ AriesBlaze**, blending music, motion, and code into immersive digital experiences. My goal: to create tech that doesn't just work — it **impresses**.

Projects

Mobat Deluxe Kitchen

HTML | CSS | JavaScript | WhatsApp API

Built a full-featured restaurant website with dynamic menu, cart, and WhatsApp ordering. Features rotating cutlery loader, auto-changing background, hidden admin panel (3-click + password), and responsive design.

Live Demo

AriesBlaze DJ Voice-Over

HTML | CSS | JavaScript | SFX

Created an interactive audio experience with sirens, blasts, and cinematic drops. Simulates a live DJ intro with timing cues and visual feedback.

Live Demo

Deluxe Portfolio

HTML | CSS | Animations | Responsive

Designed a luxury portfolio with glassmorphism, custom cursor, scroll animations, and embedded testimonials. Built to showcase creativity and technical skill.

Experience

Freelance Web Developer

Self-Employed · 2023 – Present

Developed responsive websites for personal brands and small businesses. Focused on performance, accessibility, and user experience. Deployed via GitHub and Netlify.

DJ & Music Producer (AriesBlaze)

Independent Artist • 2020 – Present

Produced Afrobeat, Trap, and Street mixes. Designed audio intros with branding drops. Merged music with digital presence through code and visuals.

Achievements

• Built 3 full projects with zero frameworks — proving deep core skills.
• Created a job-winning portfolio project from scratch.
• Successfully deployed and shared real-world links.
• Self-taught developer with strong problem-solving and creativity.
